# List of ID3v1 Genres

From Wikipedia, the free encyclopedia

Article Talk

For an explanation of this List of ID3v1 Genres, see ID3. ID3 is a metadata container most often used in conjunction with the MP3 audio file format. It allows information such as the title, artist, album, track number, and other information about the file to be stored in the file itself.

Genre definitions 0-79 follow the ID3 tag specification of 1999.<sup>[1]</sup> More genres have been successively introduced in later Winamp versions.<sup>[2]</sup>
